

Greetings from Art Prize organizer Hargen Depelmann

The newly designed Art Prize Germany offers academically trained artists from Germany and abroad a unique opportunity to dedicate themselves to current topics that move the world on the basis of a high-class competition - and with the nonverbal language of the fine arts a unique position or vision as an artistic message to offer, with paintings, sculptures, photographs or digital art.

At a time when the rulers of world powers are playing “va banque” and the press has lost credibility due to their accused “fake news”, visionary artists are in demand, perhaps more than ever before!

As an art gallery that has been operating successfully across Europe for over 40 years, including at international art fairs, we have the necessary resources and contacts to fill the great potential of this art prize competition with life in the interests of applicants. One of the “adjusting screws” is the book on the German Art Prize, in which the artists nominated by the independent jury are presented with their nominated work on one page, as well as on the website www.kunstpreis-deutschland.de.

In addition, all artists applying for the Art Prize Germany will be considered in the book for the Art Prize (publisher: Galerie Depelmann Edition-Verlag GmbH), with their name and place of residence, as well as on the above website. As the organizer of this competition, I am also looking forward to artistically unique contributions / applications from ambitious young artists who will not be charged a processing fee for two submitted works.

I wish the application phase, the art award ceremony with the vernissage on October 31, 2021 and the finissage on November 28, 2021 with the award of the audience award, all the best.
